

# Product Analysis and Verification Services for Professionals in the Construction Sector

At a time when our expertise is needed more than ever to navigate through the fragmented, rapidly evolving sustainable product industry, EcoSpex streamlines your product research for energy, healthy and green building requirements.

## EcoSpex Product Analysis & Verification Services

Tired of searching all of the material databases? Navigating product choices for multiple projects? Need help in meeting the more challenging credit requirements? Our product research service can support projects which include: attainable housing, academic post-secondary; community centres; museum; hospital; commercial; MURB; and condo projects.

EcoSpex does the heavy lifting by providing an independent third party analysis by validating and standardizing manufacturer's sustainable product information. To obtain a validated Verified Product from EcoSpex, the manufacturer will undergo a rigorous and transparent analysis process. Our team of experts will guide manufacturers through our Quality Assurance Process, while helping project teams meeting targets and timelines more efficiently.

### EcoSpex Verification Services does an analysis of the following:

- Technical Product Information
- Environmental Data Sheet (EDS)
- Environmental Product Declaration (EPD)
- Life Cycle Analysis (LCA)
- Health Product Declaration HPD®
- Other Environmental Health Reports and Certifications
- Declare: Chemical ingredients declaration
- Certificate of recycled content
- Company commitment to sustainability

## What This Means to Your Firm

- **Improve Productivity** access product information that can be used for multiple projects. Boost your ROI for each project.
- **Build Internal Capacity** Reduce the time for project teams. Save money by not watering down your own consulting costing.
- **Access Trusted Documents & Quality Information** Our standardized and customized templates enable your team verified criteria for commercial rating programs to credit requirements aligned to MasterFormat.
- **Deepened conversation and best practices** by reducing silos within the project teams and contractors.
- **Bring value to your clients by achieving higher certification levels** we do the grunt work to support your projects teams by gathering the commonly specified products, technologies and materials specific for your target project.
- **Stay Updated** we work with the most current products and material manufacturers to gather proper data by analyzing and verifying their documentation, environmental and technical documents. We provide training to your teams on how to use documentation for your projects.
- **Driving Innovation** not sure about a new product to support your Net Zero or Passive House requirements? We help support latest developments on water, energy efficient, low carbon and demand reduction technologies for new/retrofit markets as well as commonly used products used by the specification community.
